Software engineering is an essential aspect for obtaining a systematic, disciplined and quantifiable approach to the development, operation, and maintenance of software and services. Incorporating security and privacy during the engineering process is of vital importance for assuring the development of reliable, correct, robust and trustful systems as well as adaptive, usable and evolving software services that satisfy users’ requirements.

For many years software engineers were focused in the development of new software thus considering security and privacy mainly during the development stage as an ad-hoc process rather than an integrated one initiated in the system design stage. However, the data protection regulations, the complexity of modern environments such as IoT, IoE, Cloud Computing, Big Data, Cyber Physical Systems etc. and the increased level of users’ awareness in IT have forced software engineers to identify security and privacy as fundamental design aspects leading to the implementation of more trusted software systems and services. Researchers have addressed the necessity and importance of implementing design methods for security and privacy requirements elicitation, modeling and implementation the last decades. Today Security by Design (SbD) and Privacy by Design (PbD) are established research areas that focus on these directions.

**Topics**

The aim of the specific workshop is to provide researchers and professionals the opportunity to publish novel and cutting edge research to topics such as:

- methods, tools and techniques for the elicitation, analysis and modeling of security and privacy requirements
- Security and Privacy testing methods and tools
- adaptive Security and Privacy related methods and tools
Submission

Submitted papers must not substantially overlap with papers that have been published or that are simultaneously submitted to a journal or a conference/workshop with proceedings. The workshop proceedings will be published by Springer in the Lecture Notes in Computer Science (LNCS) series (joint post proceedings).

All submissions should follow the LNCS template from the time they are submitted. Submitted papers can be either full papers or short papers. Full papers should be at most 20 pages while short papers should be at most 8 pages including the bibliography in both cases. All submissions must be written in English. Submissions are to be made to the Submission web site. Only pdf files will be accepted.

Submissions not meeting these guidelines risk rejection without consideration of their merits. Authors of accepted papers must guarantee that their papers will be presented at the workshop.

Extended versions of high quality accepted papers will be given fast track opportunity to be published in Information and Computer Security journal.

Submissions are made through the Easychair following the link: https://easychair.org/conferences/?conf=secpre2017

Important Dates

Submission Deadline: 7 July 2017 (11:59 p.m. American Samoa time UTC-11)
NEW DEADLINE: 16 July 2017 (11:59 p.m. American Samoa time UTC-11)
Notification to Authors: 30 July 2017
Camera-Ready versions: 27 August 2017
Organization

General Chairs
- Prof. Annie Antón, Georgia Institute of Technology, USA
- Prof. Stéfanos Gritzalis, University of the Aegean, Greece

Program Committee Chairs
- Prof. John Mylopoulos, University of Toronto, Canada
- Asst. Prof. Christos Kalloniatis, University of the Aegean, Greece

Program Committee Members (To be Completed)
- Travis Breaux, Carnegie Mellon University, USA
- Frederic Cuppens, Telecom Bretange, France
- Sabrina De Capitani di Vimercati, Università degli Studi di Milano, Italy
- Theo Dimitrakos, University of Kent, UK
- Mohamad Gharib, University of Florence, Italy
- Paolo Giorgini, University of Trento, Italy
- Maritta Heisel, University of Duisburg-Essen, Germany
- Jan Juerjens, University of Koblenz-Landau, Germany
- Costas Lambrinoudakis, University of Piraeus, Greece
- Tong Li, Beijing University of Technology, China
- Javier Lopez, University of Malaga, Spain
- Fabio Martinelli, National Research Council - C.N.R., Italy
- Aaron Massey, University of Maryland, USA
- Haralambos Sourlidis, University of Brighton, UK
- Liliana Pasquale, University College Dublin, Ireland
- Michalis Pavlidis, University of Brighton, UK
- David Garcia Rosado, University of Castilla-La Manca, Spain
- Mattia Salnitri, University of Trento, Italy
- Pierangela Samarati, Università degli Studi di Milano, Italy
- Nicola Zannone, Eindhoven University of Technology, The Netherlands
